

AMENDMENTS TO THE SPECIFICATION:

Please amend the Abstract of the Specification as follows:

A liquid crystal display includes a liquid crystal display panel having a plurality of pixels on a display line; ~~a~~ A set of drivers ~~for driving~~ drives a set of pixels, the set of drivers receiving display data and providing video signals to the set of pixels; ~~a~~ A clock ~~for providing~~ provides a clock signal to the set of drivers to latch the display data based on a frequency of the clock signal, ~~wherein the clock~~ and receives a feedback signal from the set of drivers prior to an end of the display data received by the set of drivers; ~~and a~~ A delay circuit ~~for stopping~~ stops the clock signal to the set of drivers, based on the feedback signal, ~~wherein the delay circuit stops the clock signal to the set of drivers after delaying for a first time period, the first time period being~~ that is no less than a predetermined time period between the feedback signal and the end of the display data received by the set of drivers.
